

2K-UniCan

If anyone CAN - we CAN!

2K-UniCan

Two become one: 2K-UniCan combines metal containers

The benefits of 2K-UniCan „made by Pirlo“ at a glance:

- Dangerous goods certificates for A and B component
- Special lid geometry of the lower container connects two metal packaging elements to ensure safe transportation together
- A component: Conical bucket with nominal volumes of 6 to 12 litres
- B component: Cylindrical bucket with nominal volumes of 2,5 to 6 litres
- Same clamping rings for A and B component
- Individual containers and combinations stackable

Our experts will be happy to help you with any questions you may have pertaining to the 2K-UniCan. Special can sizes are possible on request.
